Marina Maffia

Technical Writer

Albuquerque, NM • Email • LinkedIn • Portfolio

Professional Summary

Technical writing professional experienced in creating product documentation, user guides, knowledge bases, troubleshooting content, and release documentation for enterprise software. Skilled in translating complex workflows into clear, user-centered guidance, collaborating with engineering and support teams, and improving documentation through structured authoring, content reuse, and effective documentation workflows. Technical background includes PHP, SQL, Linux, and web development.

Core Skills

Technical Writing • Technical Documentation • Docs-as-Code Workflows • Git/GitHub • HTML/CSS • Knowledge Base Management • Documentation Architecture • Documentation Standards • Structured Authoring • Information Architecture • Linux CLI

Professional Experience

Senior UX Writer at **Turnitin** *Aug 2022 - Present*

- Write and maintain product documentation for administrators, instructors, and students across enterprise SaaS platforms, translating complex workflows into clear, actionable guidance.
- Create and publish structured help center articles, workflow documentation, and release content supporting major product updates and self-service support.
- Collaborate with Product, Engineering, and Support teams to understand software functionality, clarify technical details, and ensure documentation accuracy.
- Identify workflow gaps, inconsistencies, and edge cases during documentation reviews to improve the accuracy and usability of customer-facing guidance.
- Audit, reorganize, and consolidate large-scale help center content to improve navigation, findability, consistency, and long-term maintainability.
- Establish consistent documentation structures, terminology, and formatting practices to support reusable content and scalable knowledge management.

- Manage documentation workflows in MadCap Flare using Git/GitHub for version control, content reuse, publishing, and ongoing maintenance.

Web Developer / Technical Support Specialist at **MAIN** *Jun 2016 - Aug 2022*

- Authored and maintained a 100+ page software support manual serving a 38-library consortium, providing comprehensive guidance for software users and support staff.
- Developed and managed staff-facing and public-facing knowledge bases containing more than 200 troubleshooting and technical support articles.
- Designed, developed, maintained, and documented an internal PHP/SQL web application using HTML, CSS, JavaScript, and SQL.
- Documented IT infrastructure, software support, hardware deployment, and network troubleshooting procedures across distributed library environments.
- Produced screen-recorded tutorials and training materials to help staff learn software workflows and resolve common issues independently.
- Provided hands-on technical support to library staff across multiple locations, using direct user feedback and troubleshooting experience to inform documentation.

Tools & Technologies
